

③ Something that surprised me was...

- I couldn't tell if some of the mushrooms I saw were new or from last year. They were all white!

- It was colder this weekend, so maybe the ground here isn't warm enough yet for woodland wildflowers.

- There were lots of little insects flying around by the water!

- The turtles seemed really shy today - they jumped off the log as soon as they saw me. Maybe they got braver with time!

April 2021 Date: Mon. April 12, 2021
Spring changes Time: 2:25 pm
Location: Lytle's Landing

Weather:

Air: 46 °F

Wind: 7-10 mph

Sky

cloud type

stratus

① I predict I'll see these signs of spring...

- leopard frogs calling
- turtles sunning themselves
- tiny leaves growing
- Spring wildflowers???
- muskrats swimming
- ducks flying through the woods

I saw...

- I heard a few frogs calling but am not sure they're leopard frogs.
- 3 turtles on a log!
- lots of leaf buds!
- no flowers yet!
- I didn't see any muskrats or a beaver.
- I heard ducks flying but didn't see them.
